# MD AFZAL KHAN

## Senior Software Engineer | Full Stack Development | RESTful APIs | Cloud Solutions

+91-9842139786 mohdafzal330@gmail.com linkedin.com/in/mohammed-afzal-khan github.com/mohdafzal330
Hyderabad, India

## SUMMARY

Full Stack Developer with 7 years of experience in building cross-Platform applications, optimizing systems, and enhancing user experiences. Strong problem-solving skills with a focus on delivering results in fast-paced environments. Quick to adapt to evolving technologies and committed to continuous learning.

## EXPERIENCE

### Senior Software Engineer - II

**Lyric India**

09/2025 - Present Hyderabad

https://www.lyric.ai

Advanced AI for Healthcare Payer Solutions

- Contributed to **Studio42**, a scalable **multi-tenant healthcare platform** built on **microservices (.NET Core)** and **micro-frontend (React.js)** architecture.
- Owned end-to-end development of **Sourcing** and **Change Request (CR) modules**, designing **scalable REST APIs**, workflows, and data models.
- Led integration with core platform services including **User Service (authentication & profiles)** and **Organization Service (tenant management)** to enable multi-tenant capabilities.
- Defined **Architecture Decision Records (ADRs)** and drove **database schema design**, ensuring consistency and scalability across services.
- Implemented **role-based access control (RBAC)** and contributed to secure, multirole workflows across modules.
- Led adoption of secure coding practices and integrated Snyk across repos/IDEs.
- Identified and resolved **vulnerabilities** across services; recognized for impact.

### Senior Software Engineer

**British Petroleum @Telent Beacon**

10/2023 - 05/2025 Bengaluru

Remote working environment focusing on software development and solutions

- Developed & Launched the turkey based CARAMA app in India as Castrol Connect MVP
- Designed and developed new features for India MVP
- Revamped App UI to new modern and responsive UI
- Designed and developed new features for TRM APP
- Optimized the user search with debouncing and optimized algorithms
- Conducted **technical interviews** and contributed to hiring decisions

### Software Development Engineer II

**Amazon**

10/2022 - 10/2023 Bengaluru

Leading global company providing e-commerce and cloud computing solutions

- Designed & developed monitoring service for **Amazon Dash Cart**
- Delivered the end to end RCA tool features
- Optimized the current system architecture reduced AWS cost by 60%
- Improved logging code using OOPs by 80%
- Handled the components with scaling problems
- Contributed in Engineering Excellence program

## KEY ACHIEVEMENTS

**Problem Solving**

Solved 700+ problems on NADOS and LEETCODE

**Coding Competition Award**

1st Runner-Up, Coding Competition, EXORDIUM Fest, CAMPUS

**Programming Contest Rank**

Secured 9th Rank in the Codernity Programming Contest at Internity

## SKILLS

React JS | C# | Angular | S3 | Node JS | Express JS | REST APIs | AWS | ASP.NET MVC | SQL Server | Liquibase | Typescript | NEST JS | Net Core | Data Structures | Gen-AI | DynamoDB | GIT | JavaScript | Java | React Native | LINQ | MongoDB | AZURE | Agentic AI | Claude | RAG SYSTEMS | Native AI

## PROJECTS

### Crafter Hack - DSA Prep Platform

06/2023 - 11/2023

https://crafterhack.com/

A platform for **practicing DSA** with real-time coding, mock interviews, and leaderboards.

- Built a web platform with modules for **DSA** problem-solving, **live coding rooms**, leader-board, mock interviews, and 75 hard coding challenges.
- Improved coding session engagement by 40% by implementing a real-time environment with **WebSockets**.
- Designed a **weekly** coding challenge module with automated problem scheduling and user **reminder notifications** to drive consistent participation.
- Created a **mock interview** feature with timed coding challenges and feedback.
- Integrated user profiles with progress tracking and **statistics**.

## EXPERIENCE

### Senior Software Engineer

**Nagarro Software Pvt Ltd**

06/2021 - 09/2022 Gurgaon

Provider of end-to-end digital solutions for their clients

- Designed end-to-end Deposit & payments module served by 1000+ customers
- Integrated the functionality to download the attachments, via emails link click with authentication and authorization
- Integrated the Distribution mechanism in payment module to show the payments distribution
- Optimizing the existing system codebase by 25%
- Mentored junior developers, led onboarding, and helped them ramp up quickly within the team

### Software Engineer

**Mindfire Solutions**

05/2019 - 06/2021 Noida

Providing quality software solutions in multiple domains

- Worked on HIPAA standard form to generate the claims
- Integrated patient accounts, visit list and statement generation modules in the application
- Used SFTP service for transferring the claim-files (100+ files/day) to the clearing houses
- Integrated & written complex stored procedure & custom functions to process the data using complex queries
- Optimized the existing system codebase, SQL queries and handled live errors

## PROJECTS

### E-assignment System

08/2017 - 09/2017

E-assignment System

- Managed online submissions for more than 15 departments, improving efficiency by reducing manual errors by 25%
- Increased 30% security by designing role-based authentication
- Used server side filtering, paging, sorting

## EDUCATION

### Bachelor of Technology

MJP Rohilkhand University (08/2015 - 05/2019)

## INTERESTS

**Problem Solving**

Interest in solving algorithmic problems and participating in coding competitions

## LANGUAGES

**English**
Proficient

**Hindi**
Native

**Urdu**
Proficient
